

ACCEPTABLE USE - STUDENT

Introduction

The Derry Cooperative School District (DCSD) recognizes that access to technology in school gives students greater opportunities to learn, engage, communicate, and develop skills that will prepare them for work, life, and citizenship. We are committed to helping students develop 21st-century technology and communication skills. To that end, we provide access to technologies for student and staff use.

This Acceptable Use Policy outlines the guidelines and behaviors that students are expected to follow when using school technologies or when using personally owned devices on the school property.

- The DCSD network is intended for educational purposes.
- All activity over the network or using district technologies may be monitored and retained.
- Access to online content via the network may be restricted in accordance with our policies and federal regulations, such as the Children's Internet Protection Act (CIPA).
- Students are expected to follow the same rules for good behavior and respectful conduct online as offline.
- Misuse of school resources can result in disciplinary action.
- The DCSD makes a reasonable effort to ensure students' safety and security online, but will not be held accountable for any harm or damages that result from use of school technologies.
- Students using the district network or other technologies are expected to alert teachers immediately of any concerns for safety or security.

Technologies Covered

The DCSD may provide Internet access, desktop computers, mobile computers or devices, videoconferencing capabilities, online collaboration capabilities, message boards, email, and more. This Acceptable Use Policy applies to school-owned technology equipment utilizing the DCSD network, the DCSD Internet connection, and/or private networks/Internet connections accessed from school-owned devices at any time. This Acceptable Use Policy also applies to privately owned devices accessing the DCSD network, the DCSD Internet connection, and/or private networks/Internet connections while on school property.

As new technologies emerge, the DCSD will attempt to provide access to them. The policies outlined in this document are intended to cover *all* available technologies, not just those specifically listed.

Usage Policies

All technologies provided by the district are intended for education purposes. All students are expected to use good judgment and to follow the specifics of this document as well as the spirit of it: be safe, appropriate, careful and kind; don't try to get around technological protection measures; use good common sense; and ask if you don't know.

Web Access

The DCSD provides its students with access to the Internet, including web sites, resources, content, and online tools. That access will be restricted in compliance with CIPA regulations and school policies. Web browsing may be monitored and web activity logs are public record and may be retained indefinitely.

Students are expected to respect that the web filter is a safety precaution, and should not try to circumvent it (including the use of personal MiFi devices) when browsing the Web. If a site is blocked and a student believes it shouldn't be, the student should seek assistance from an adult (teacher or staff) who could, if appropriate, alert an IT staff member or submit the site for review.

Email

The DCSD may provide students with email accounts for the purpose of school-related communication. Availability and use may be restricted based on school policies.

If students are provided with email accounts, they should be used with care. Students should not send personal information; should not attempt to open files or follow links from unknown or untrusted origin; should use appropriate language; and should only communicate with other people as allowed by the district policy or the teacher.

Students are expected to communicate with the same appropriate, safe, mindful, courteous conduct online as offline.

Email is public record and may be monitored and archived.

Social/Web 2.0 / Collaborative Content

Recognizing the benefits collaboration brings to education, the DCSD may provide students with access to web sites or tools that allow communication, collaboration, sharing, and messaging among users.

Students are expected to communicate with the same appropriate, safe, mindful, courteous conduct online as offline. Posts, chats, sharing, and messaging may be monitored. Students should be careful not to share personally identifying information online.

Mobile Devices Policy

The DCSD may provide students with mobile computers or other devices to promote learning outside of the classroom. Students should abide by the same acceptable use policies when using school devices off the school network as on the school network.

Students are expected to treat these devices with extreme care and caution; these are expensive devices that the school is entrusting to your care. Students should report any loss, damage, or malfunction to an adult (teacher or staff) immediately. Students may be financially accountable for any damage resulting from negligence or misuse.

Use of school-issued mobile devices off the school network may be monitored.

Personally Owned Devices Policy

Students should keep personally owned devices (including laptops, tablets, smart phones, cell phones and other mobile devices) turned off and put away during school hours—unless in the event of an emergency or as instructed by a teacher or staff for educational purposes.

Because of security concerns, when personally owned mobile devices are used on school property, they should not be used over the school network without express permission from IT staff. In some cases, a separate network may be provided for personally owned devices.

Security

Students are expected to take reasonable safeguards against the transmission of security threats over the school network. This includes not opening or distributing infected files or programs and not opening files or programs of unknown or untrusted origin. If you believe a computer or mobile device you are using might be infected with a virus, please inform an adult (teacher or staff). Do not attempt to remove the virus yourself or download any programs to help remove the virus.

Downloads

Students should not download or attempt to download or install programs over the school network or onto school resources without express permission from an adult (teacher or staff).

You may be able to download other file types, such as images or videos. For the security of our network, download such files only from reputable sites, and only for education purposes.

Digital Citizenship, Ethics and Netiquette

Students should always use the Internet, network resources, and online sites in a courteous and respectful manner.

Students should also recognize that among the valuable content online is unverified, incorrect, or inappropriate content. Students should use trusted sources when conducting research via the Internet.

Students should also remember not to post anything online that they wouldn't want parents, teachers, or future colleges or employers to see. Once something is online, it's out there—and can sometimes be shared and spread in ways you never intended.

Plagiarism

Students should not plagiarize (or use as their own, without citing the original creator) content, including words or images, from the Internet. Students should not take credit for things they didn't create themselves, or misrepresent themselves as an author or creator of something found online. Research conducted via the Internet should be appropriately cited, giving credit to the original author.

Personal Safety

Students should never share personal information, including phone number, address, birthday, daily schedule, social security number, or financial information, over the Internet without adult permission. Students should recognize that communicating over the Internet brings anonymity and associated risks, and should carefully safeguard the personal information of themselves and others. Students should never agree to meet someone they meet online in real life without parental permission.

If you see a message, comment, image, or anything else online that makes you concerned for your personal safety, bring it to the attention of an adult (teacher or staff if you're at school; parent if you're using the device at home) immediately.

Cyberbullying

Cyberbullying will not be tolerated. Harassing, dissing, flaming, denigrating, impersonating, outing, tricking, excluding, and cyberstalking are all examples of cyberbullying. Don't be mean. Don't send emails or post comments with the intent of scaring, hurting, or intimidating someone else.

Engaging in these behaviors, or any online activities intended to harm (physically or emotionally) another person, will result in severe disciplinary action and loss of privileges. In some cases, cyberbullying can be a crime. Remember that your activities are monitored and retained.

Examples of Acceptable Use

I will:

- Use school technologies for school-related activities.
- Follow the same guidelines for respectful, responsible behavior online that I am expected to follow offline.
- Treat school resources carefully, and alert staff if there is any problem with their operation.
- Encourage positive, constructive discussion if allowed to use communicative or collaborative technologies.
- Alert a teacher or other staff member if I see threatening, inappropriate, or harmful content (images, messages, posts) online.
- Use school technologies at appropriate times, in approved places, for educational pursuits.
- Cite sources when using online sites and resources for research.
- Recognize that use of school technologies is a privilege and treat it as such.
- Be cautious to protect the safety of others and myself.
- Help to protect the security of school resources.

This is not intended to be an exhaustive list. Students should use their own good judgment when using school technologies.

Examples of Unacceptable Use

I will **not**:

- Use school technologies in a way that could be personally or physically harmful.
- Attempt to find inappropriate images or content.
- Engage in cyberbullying, harassment, or disrespectful conduct toward others.
- Try to find ways to circumvent the school's safety measures and filtering tools.
- Use school technologies to send spam or chain mail.
- Plagiarize content I find online.
- Post personally identifying information, about others or myself.
- Agree to meet someone I meet online in real life.
- Use language online that would be unacceptable in the classroom.
- Use school technologies for illegal activities or to pursue information on such activities.
- Attempt to hack or access sites, servers, or content that isn't intended for my use.

This is not intended to be an exhaustive list. Students should use their own good judgment when using school technologies.

Limitation of Liability

The DCSD will not be responsible for damage or harm to persons, files, data, or hardware.

While the DCSD employs filtering and other safety and security mechanisms, and attempts to ensure their proper function, it makes no guarantees as to their effectiveness.

The DCSD will not be responsible, financially or otherwise, for unauthorized transactions conducted over the school network.

Violations of this Acceptable Use Policy

Violations of this policy may have disciplinary repercussions, including:

- Suspension of network, technology, or computer privileges
- Notification to parents
- Detention or suspension from school and school-related activities
- Legal action and/or prosecution

I have read and understood this Acceptable Use Policy and agree to abide by it:
